Mr. Perry A. Chapdelaine, Sr.  
The Rheumatoid Disease Foundation  
Rt. 4 Box 137  
Franklin  
TN 37064

Dear Mr. Chapdelaine, Sr.:

As regards to resistant bacteria of L forms or cell wall deficient organisms (CWD bacteria). I have found using the following combination effective through the years in most cases:

Cleocin (Clindamycin - UpJohn) 150 mg. 1  
capsule every 6 hours x well.

Declomycin (Demeclocycline - Lederle) 150 mg.  
1 capsule every 6 hours x well.

Best wishes.

Yours sincerely,  
/s/ Archimedes A. Concon, M.D.
