Professor R. Wyburn-Mason
2 Hillbrow
Richmond Hill
Surrey England

Dear Sir;

It was a great shock to me when I was call in our representative office, and Reiko Yoshioka explained that our Patent is invalid (our first patent application, October 7, 1975).

With the following reasons: (1) Patent Bureau discovered that on Asahi daily newspaper reported before our application date and said "quoted as (AP-London) descri^d in details about your New Views on Protozoa is possible aetiological causing Rheumat^o diseases. (2) November 30th also (AP-London) in that same article, opinion by Jun^o Medical School Hospital remarked and a severe dispraised such theory and treatme^t.

Above two factors are obstacle for the Bureau deciding our Patent app^ration will be invalid and the first place that AP-London reported to Asahi News^r before our application (to the Bureau that our's secondary news. Bureau's regul^oion is that Any patent application is originally very first announcement to the Bur^r).

Although, Professor Wyburn-Mason himself prove otherwise, that AP-London reporter did it without your acknowledgement, selfishly reported while you ar^e still experiment-
ing, animal toxicological and clinical trials incomplete. That you never met AP-
London nor Jpanese reporter, although you received a few telephone call for an inter-
view but you never did see anyone of them because your resear^oes were not completed
at time.

Bureau wanted know the fact from you not anybodyelse. Therefore, please do
it immediatly and you can write to our representative Reiko Yoshioka and address
printed in the name card.

Sincerely yours,

Dr. T. Koba, M.D.
