Perry A. Chapdelaine, Sr.
The Rheumatoid Disease Foundation
Rt. 4, Box 137
Franklin, Tennessee 37064

Dear Mr. Chapdelaine:

Thank you for your letter of 9-25-85 outlining in general the payment plans for Dr. Duane Smith's grant entitled "Arachidonic Acid Metabolism in Neutrophils from Patients with Rheumatoid Arthritis" which is Rheumatology protocol R-1120A. The methods for payment for this \$10,000 grant outlined in your letter are quite acceptable. The method of payment initiated of sending the payments to Dr. Smith in care of me for deposit in accounting will be also quite acceptable.

Also, as outlined in my letter of 8-23-85, the reduced payment per month for Rheumatology protocol R-1120, which you have already initiated, is also acceptable as long as the total grant and agreed upon charges are not changed by the temporary decrease in monthly payments and spreading out the payments to allow other valuable ongoing projects like those of Dr. Smith and Dr. Franson. I am enclosing along with this letter Dr. Smith's protocol and budget so you will have them for your records. Please let me know if you need additional information concerning this matter.

I want to thank you and the Foundation again for your continuing support and cooperation in matters of mutual interest. I will look forward to further communications and collaboration on projects of mutual interest.

Yours truly,

Robert Turner, M.D.

RT/mam
